

My Christmas Wish For Us Mi Deseo de Navidad Para Todos

Mis hermanas y hermanos,

Imagine if our government looked like our country, if we, the people- the actual citizens of this country- comprised our public institutions, instead of this other class of citizen, the “politician”.

Imagine if women held 222 seats in the House, and Black women alone, 29? Or if 1 in 10 Representatives was a member of a union, or 1 in 2 had experienced food insecurity? If 2 members of the Senate Committee on Agriculture were family farmers? Or if 50% of all federal judge appointees were people of color?

In the coming weeks, I am going to use this newsletter as a means to share with you my vision, why I believe not only is this America possible, it is absolutely essential, and why I am the only candidate in the race for U.S. Senate of Texas to realize it.

I want to give you an idea of what it looks like when you are driven to undertake a, if not Sisyphian then Herculean, goal out of a compulsion you barely understand, much less be able to articulate.

I need you to understand what it means to enter a contest for something as consequential as a U.S. Senate seat without having fundraised a single dollar before filing. Because this

is democracy, and the prerequisite for an American citizen to run for office should not be an amount of money that most Americans will never realize in their savings account.

But for right now, I wish for each of you to have the physical and mental space to put the world on pause, and indulge in all the little pleasures that make our time on this big, blue marble worth it.

Feliz Navidad, Happy Hanukkah, & Happy Holidays!

Annie
